Mr. Rakesh Sharma
President
RD Engineering College
Ghaziabad

Dear Mr. Rakesh Sharma,

It was a pleasure to attend the function for "Inauguration of Innovation Centers" at your Institute, R.D. Engineering College, Ghaziabad and I was delighted to see the level of Technology and infrastructural facilities along with the quality live projects of the Companies that are being undertaken in collaboration with different companies to provide training by involving latest cutting edge technology prevalent in the industries.

I was also very pleased to see the involvement of several Senior Executives of the participating Companies of the Innovation Centers such as Head, University Programs, Google; Country Head D-Link, Director, Creative Robotics; Chief Technical Officer as well as Vice-President, HR, R Systems; CEO, Zventech Ltd., Training Officer, Date-64 etc. The discussion with Senior Executives regarding live projects of the Companies and training being offered to the students was also very stimulating. I must congratulate you and the management of RD Engineering College for taking up such a remarkable initiative which can become an excellent example of the Institute-Industry participation for the benefit of all three stake holders, viz. students, Institute and the Industry. The knowledge thus gained coupled with the exposure to Corporate Culture, would enable the outgoing students to compete at global level as well as may be it would drive some of them to become entrepreneur.

I have great admiration for you and your efforts and wish that these activities should be continued and diversified to include additional newer areas. The facilities provided to the students at the Innovation Centers with no additional costs to the students are highly encouraging for the whole technical education in the State. The success of your initiative can lead to a new dimension to innovative curricula frame work in Engineering & Technical teaching Programs.

With best wishes,

(Prof. S.K. Kak)
